SOFTWARE ENGINEER

Experience in Ruby on Rails and Javascript based programming and current Software Engineer Intern with a small startup in San Francisco. Former pastry chef who developed hundreds of products from scratch daily and employed adaptability in a fast-paced environment. 2+ years in project management and a knack for conceptualizing and delivering elegant, user-friendly solutions. Excited to connect people through technology after many years of connecting people through food.

TECHNICAL SKILLS

Ruby, Ruby on Rails, SQL, Javascript, React, Redux, Python, HTML/CSS, Bootstrap, Git

TECHNICAL PROJECTS

Sweet Spot: Pastry E-Commerce – [Live Preview](#) | [Github: Front End](#) | [Github: Back End](#)

An e-commerce website for pastry chefs to sell their products to people in their communities.

- Implemented user interface employing React, Redux, and Thunk with Material UI for styling
- Incorporated Stripe API to create a fully functional customer checkout experience
- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side

Pot n' Plot: Virtual Gardening – [Live Preview](#) | [Github](#)

A virtual gardening website for users to create a garden and populate it with real plant data.

- Built web app entirely with Ruby on Rails following the MVC structure and utilizing bcrypt for authentication
- Made use of Trefle.io API to create plant entries with real-time data
